Key Courses: OOP, DSA, DBMS, Software Engineering, Operating Systems, Computer Communication & Networking, Systems Programming, Intro to AI, Design & Analysis of Algorithms, Deep Learning, Data Science, NLP, Data and Network Security

PROFESSIONAL EXPERIENCE

SubscriptionFlow — YC backed startup — *Software Engineer* *Jul 2024 – present*

- Collaborated across **backend, frontend, and AI teams** to ship end-to-end product features.
- **Redesigned core UI components** across **React, Vue, and Laravel Blade**, improving performance and consistency.
- Built a **Next.js + Vercel AI marketing script platform** with **real-time personalization**.
- Improved **Hosted Payment Page** and **dunning/payment retry flows** to reduce failed payments.
- Optimized **email notifications** to improve deliverability via **SendGrid**, add conditional triggers, and **AI-powered template editing**.
- Improved **platform reliability** by resolving **multi-environment config issues** across S3/CDN, Redis, and Office365 OAuth.
- Integrated a **Monday app in React** with SubscriptionFlow for **real-time, bidirectional sync**.
- Enhanced **customer account statements** and **analytics reports** with styling and customization options.
- Trained **Vanna.ai** on internal datasets to deliver accurate sales insights.
- Set up **Cypress tests** to validate core workflows and UI early in the pipeline.

OneByte — *Web Development Intern* *Jul 2023 – Aug 2023*

- Converted Figma designs into **responsive, pixel-perfect sites** using **TypeScript, React, Tailwind, Redux Toolkit and Vite**.
- Built and launched the official website for **Augment Scale** using **Webflow**.

Finera — *Software Development Intern* *Jun 2023 – Aug 2023*

- Migrated logistics management system for truck drivers from **Java** to **Flutter**, adding routing and inventory modules.
- Boosted feature responsiveness by **~15%** through real-time API integrations.

PERSONAL PROJECTS

Koro.ai — *Voice-First AI Tutor* *Aug 2025*

- Built using **TypeScript, Next.js, Supabase and Tailwind**.
- Built hosted AI-generated lesson plans and adaptive assessments using Cloudflare Workers AI.
- Delivered voice-enabled tutoring, persisted lesson sessions, and an interactive blackboard.

FocusFlow — Final Year Project — *AI-powered Schedule Management* *Feb 2024*

- Built an installable responsive planner using React, TypeScript, Node.js, MongoDB, and Flask.
- Created a **custom ML scheduling engine** for balanced study/lifestyle plans.

LEADERSHIP & EXTRA-CURRICULARS

Microsoft Club GIKI — *Events & Logistics Coordinator* *Feb 2023 – May 2024*

- Managed logistics and finances for GIKI's **first intra & national hackathons**.
