EXPERIENCE

Software Engineer

Jul. 2024 – Present

SubscriptionFlow (Y Combinator)

Lahore, Pakistan

- Built subscription billing and SaaS workflows across Laravel/MySQL backends and Next.js interfaces.
- Improved hosted checkout validation and payment recovery for invalid customer data and failed payments.
- Added Microsoft 365 shared mailbox sending with OAuth and Microsoft Graph, including fallbacks for mailbox access errors.
- Reworked invoice payment recovery to choose automatic retries or manual reminders based on available payment methods.
- Integrated Klaviyo for customer and list sync, bulk imports, retries, and webhook-driven unsubscribe updates.
- Implemented two-way synchronization between SubscriptionFlow and Monday.com with configurable field mapping and failure recovery.

Web Development Intern

Jul. 2023 – Aug. 2023

OneByte

Lahore, Pakistan

- Built responsive React interfaces from Figma with TypeScript and Tailwind CSS, and launched Augment Scale's marketing site in Webflow.

Software Development Intern

Jun. 2023 – Aug. 2023

Finera

Lahore, Pakistan

- Rebuilt Java-based logistics features in Flutter for routing, inventory, and driver workflows using live backend data.

PROJECTS

Faask | React, TypeScript, Supabase, PostgreSQL, Edge Functions

[View](#)

- Built a live fashion discovery platform aggregating 16,900+ products from 18+ Pakistani retailers through retailer-specific crawlers and a unified ingestion pipeline.
- Designed adaptive ranking from questionnaire preferences, swipe-learned embeddings, and a collaborative signal based on products users tend to like together.
- Cut similar-product latency from 3.9s to 280ms with pgvector KNN prefiltering.
- Built hybrid semantic and full-text search with automated quality checks against synthetic personas and real swipe/save behavior.

Koro.ai | Next.js, TypeScript, Neon, Cloudflare Workers AI

- Built a voice-first AI tutor with Llama 3.1 and Deepgram for generated lessons, resource-based tutoring, assessments, and an interactive blackboard.
- Migrated authentication and application data from Supabase to Neon Postgres and Auth with row-level access controls.

FocusFlow | React, Node.js, Express, MongoDB, Flask, scikit-learn

- Built a responsive planner with a React frontend, Node.js and Express API, and Flask scheduling service.
- Developed an explainable 7- or 14-day scheduler using deadlines, routines, energy levels, and completion history.

EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI)

Topi, Pakistan

Bachelor of Science in Computer Science

Aug. 2020 – Jun. 2024

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, Dart, HTML/CSS, C, C++

Frameworks & Libraries: Node.js, Express, Next.js, React, Laravel, React Native, Flutter, Vue, Flask, Redux, Zustand, React Query, Tailwind CSS

Backend & APIs: REST APIs, GraphQL, OAuth 2.0, Webhooks, Third-Party Integrations

Data & Systems: MySQL, PostgreSQL, pgvector, Supabase, Neon, MongoDB, Redis, Prisma

Cloud & Deployment: AWS Lambda, AWS S3, Docker, Vercel

Tools & Platforms: Git, Postman, Sentry, Zapier, Webflow, Vitest, Cypress, Playwright, Vite, Resend, Claude Code, Codex
