Education

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI)

Bachelor of Science in Computer Science

Aug. 2020 – Jun. 2024

Topi, Pakistan

Experience

Software Engineer

Jul. 2024 – Present

SubscriptionFlow (Y Combinator)

Lahore, Pakistan

- Developed subscription billing and SaaS workflows across Laravel/MySQL backends and Next.js interfaces.
- Added shared-mailbox sending to Microsoft 365 with OAuth consent, Microsoft Graph support, and fallback handling for mailbox access errors.
- Reworked invoice dunning to choose automatic retries or manual reminders based on available customer or subscription payment methods, with configurable skip behavior.
- Integrated Klaviyo for customer and list sync, bulk imports, polling, retries, and webhook-based unsubscribe updates.
- Hardened scheduled email notifications by syncing recipients and configuration to the records used by scheduled jobs and adding client/server validation.
- Built two-way synchronization between SubscriptionFlow records and Monday.com boards with configurable field mapping and failure recovery.
- Improved hosted checkout validation and payment-recovery workflows for invalid customer data and failed payment attempts.

Web Development Intern

Jul. 2023 – Aug. 2023

OneByte

Lahore, Pakistan

- Developed responsive React interfaces from Figma with TypeScript, Tailwind CSS, Vite, and Redux Toolkit, and launched [Augment Scale](#)'s marketing site in Webflow.

Software Development Intern

Jun. 2023 – Aug. 2023

Finera

Lahore, Pakistan

- Rebuilt Java logistics features in Flutter for routing, inventory, and driver workflows connected to live backend data.

Projects

Faask | *React, TypeScript, Supabase, PostgreSQL, Edge Functions*

[Live](#) | [GitHub](#)

- Developed a live fashion discovery platform with 13,700+ products from 10+ Pakistani retailers using retailer crawlers and a normalization and ingestion pipeline.
- Designed adaptive ranking that combines questionnaire preferences, swipe-learned embeddings, optimized PostgreSQL scoring, and diversity rules across retailers and product types.
- Implemented hybrid semantic and full-text search, plus automated ranking evaluations across user personas to catch recommendation regressions.

Koro.ai | *Next.js, TypeScript, Supabase, Llama 3.1, Aura, MeloTTS*

[Live](#) | [GitHub](#)

- Created a voice-first AI tutor with interactive lessons, spoken responses, assessments, resource-based tutoring, and an interactive blackboard.
- Persisted accounts, tutor sessions, learning progress, resources, and generated audio in Supabase.

FocusFlow | *React, Node.js, Express, MongoDB, Flask, scikit-learn*

[Live](#) | [GitHub](#)

- Built a responsive planner with separate React web, Node.js/Express REST API, and Flask scheduling services.
- Developed an explainable 7 or 14-day scheduler using deadlines, routines, energy levels, and completion history, with recurring tasks and calendar views.

Technical Skills

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML/CSS, C, C++

Frameworks & Libraries: Node.js, Express, Next.js, React, Laravel, Vue, Flask, Redux Toolkit, Tailwind CSS, Livewire, Blade

Backend & APIs: REST APIs, GraphQL, OAuth 2.0, Webhooks, Third-Party Integrations

Data & Systems: MySQL, PostgreSQL, pgvector, Supabase, MongoDB, Redis

Cloud & Deployment: AWS Lambda, AWS S3, Vercel

Developer Tools: Claude Code, Codex, Git, Postman, Zapier, SugarCRM, Vitest, Cypress, Vite
